That Would Be a Big Help*

Johnny is 10 years old. He loves to help his mom around the house. Sometimes he **helps with** the dishes. Sometimes he helps her put **groceries** away. Sometimes he **runs to the store** for her. He is always trying to be helpful.

One day his mother bought a new desk for her **home office**. It came in two big boxes and had to be **assembled**. Johnny's mom was too busy to do it right away, so she put the boxes in the office. Johnny saw them and **offered to help**.

"Do you want me to **put that desk together** for you, Mom?" he asked.

"If you think you can do it," she said, "**that would be a big help.**"

"Oh, I'm sure I can do it. I've put together model planes and trains with **way more** parts!"

"All right, then. **Give it a shot!**" she said.

Johnny opened the boxes and took out the **instructions** first. Then he **laid out** all of the parts. Everything he needed was there—screws of various sizes, drawer handles, and a small screwdriver—so he got started.

After he had been working on the desk for **an hour and a half**, his mom checked on him.

"How's it going?" she asked.

"Pretty well. I'm **almost finished**," he said.

"Great!" she answered.

"Let me know when you're **all done**. I can't wait to see it!"

About **half an hour** later Johnny came into the kitchen where his mom was making dinner.

"It's all done," he said. "Come and see it!"

"OK, let me go have a look," she said.

They went to the office together, and his mom saw the desk. It looked just like it did in the pictures, but on top of the desk was a small bag with several screws and other small parts in it.

"What are those?" his mom asked.

"Oh, nothing," he said. "Just **leftover parts.**"

Susan's Diary

★Saturday, October 14th (11:05 p.m.)

I got a lot done today! First, I took out my box of Halloween things. I didn't have as many decorations as I thought I had. I had some Halloween-themed **knickknacks**, a small plastic pumpkin, some orange and purple lights, and that was all. So when I finished cleaning, I went shopping for more decorations! At the first place, I got some Halloween garland with cute bats and ghosts on it and a big spider web with a spider in it. At the next place, I found some really cute **stuffed toys** — a ghost, a cat **dressed up as a vampire**, and a bear **dressed as a pumpkin**. Then, I went to an **upscale** supermarket and got some **fancy** Halloween candy and some Halloween cups, plates and napkins. Finally, on the way home, I stopped at the 100-yen shop for some craft supplies. I got **construction paper**, felt, markers, paint and some other **materials** so I can make more decorations. I'll make them and **put up** all of the decorations tomorrow. After dinner, I started thinking about what to serve at the party. I found some recipes online for **spooky appetizers**. HOW MUCH DO YOU UNDERSTAND?

Read the paragraph and answer the TRUE/FALSE (本当ならT嘘ならF) questions. Answers on p. 11.

We all wear clothes, but few of us think about what effect our clothes have on the environment. Everyone has to wash their clothes, and the effect of washing our clothing is not small. Excessive washing and drying can wear out our garments and have substantial environmental *consequences**. That's because laundering them not only *degrades** the items, making us have to replace them, but if the clothes are synthetic, it also releases microfibers into waterways, contributing to microplastic pollution. By making simple changes to our laundry routines, we can reduce our effect on the environment. First, using certified energy-efficient washing machines and dryers can significantly reduce CO₂ emissions and save us money. Second, by washing clothes in cold water and air-drying them, whenever possible, we can extend the life of our clothing. Reducing the frequency of laundering and avoiding dry cleaning are also eco-friendly practices. If we all do our part, our clothing will have less of a negative impact on the environment.

- T • F 1.** The more often our clothes are washed, the faster they wear out.
- T • F 2.** Clothing made of natural fibers contribute to microplastic pollution.
- T • F 3.** Dry cleaning garments instead of washing them is not an eco-friendly option.

Let's check and practice the phrases.**

Mayumi (M) and Kayla (K) are having lunch together at the company cafeteria*.

M: I heard you telling Aoi that your mom was in the hospital. How is she?

K: She's doing OK, thanks. Her doctor said she was lack of *nutrition** because she couldn't eat. He *persuaded** her to let him put in a *feeding tube**.

M: So food goes directly into her stomach?

K: Yes. She had one before, so she knows how to feed herself through the tube.

M: That's good.

K: She had to have a *tracheostomy**, too.

M: Oh, no. Why?

K: Because her airway is so narrow that she couldn't get enough oxygen.

M: Your mom is poor! She has been through a lot!

K: She sure has. But she is getting stronger every day. I think she'll be OK.

M: I'm so glad to hear that. I hope she gets out of the hospital as soon as.

K: She's already at home!

M: That's fantastic!
